

The **Hyatt Regency Cincinnati** has an outstanding track record in maintaining our hotel in a clean & safe manner in order to provide our guests with a 1st class hotel experience associated with our brand. As such, we utilize best in class products and procedures to ensure that our facility is maintained to high sanitation standards in both our guest rooms and our public areas.

The Hyatt Regency Cincinnati partners with the Ecolab Corporation, a leader in the hospitality cleaning chemical field, and we utilize Ecolab sanitation products throughout our property. The Ecolab chemicals the hotel utilizes provide the necessary degree of sanitation & cleaning power to ensure our hotel is clean & safe for all of our guests.

In addition to the use of best in class Ecolab cleaning products, the Hyatt Regency Cincinnati has implemented Perfect CLEAN, a new cleaning procedure developed by the UMF Corporation – this system is used in our guest rooms & public areas. The Perfect CLEAN system utilizes a state-of-the-art, color-coded cleaning program that features single use, high quality microfiber cloths that are different for each area of the guestroom, i.e. bathtub, toilet, sink, bedroom, etc. These individual cloths are used only one time, in one room before they are re-sanitized for further use. Five different microfiber cloths are used in each guest room and then laundered for their next use. This system is the ultimate procedure for sanitizing and avoiding cross-contamination between different areas of the guest room as well as used in the public space. This system has been tested & adopted within multiple hospital systems throughout the United States. For more information regarding the effectiveness of the Perfect CLEAN system, please access PerfectCLEAN.com/science.

During this flu season the hotel has also increased its vigilance on cleaning & sanitizing our public areas, lobby, public restrooms, etc. Our housekeeping rotations have been increased and staff training is ongoing to ensure sanitation and disinfecting is front-of-mind. Extra attention is spent on door knobs, tables, furniture and other surfaces found in high traffic areas. The hotel also provides complimentary hand sanitizer stations for our guests located throughout the public areas of the hotel. These sanitizer stations are well marked and placed in high traffic areas.

The Hyatt Regency Cincinnati is truly committed to providing the highest level of cleanliness and sanitation so that all of our guests can have peace of mind during their visit to the hotel.
